Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Finality

The finality of the previous office action of January 10, 2002 is withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office Action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 29, 31 and 36 are rejected under 35 U.S.C. § 102(b) as being anticipated by *Hesselmann* (3,382,886).

Regarding claim 29, *Hesselmann* teaches a lid (1) for a canister body (7), said lid (1) and canister body (7) together forming a canister for receiving liquids, said canister body (7) having side walls and a bottom, said lid comprising:

an inlet port (6a) in said lid for inflow of fluids into said canister (7);

an outlet port in said lid for outflow of fluids from said canister (7); and

a conduit (4) in fluid communication with said outlet port, said conduit (4) extending to the bottom of said canister body (7) when said lid (1) is placed in covering relation to said canister body (7)(see Figs. 1 and 2, below).

Regarding claim 31, *Hesselmann* teaches a vacuum port (2)(5) in said lid (1) for application of vacuum to said canister (7) for inducing flow of fluids into said canister (7).

Regarding claim 36, *Hesselmann* teaches a suction canister (7), comprising:
a chamber for receiving fluids, said chamber being partially defined by a bottom wall;
an inlet (6a) communicating with said chamber for the inflow of said fluids into said chamber;

a vacuum port (2)(5) communicating with said chamber for application of vacuum to said chamber;

an outlet communicating with said chamber for outflow of said fluids from said chamber;
and

a conduit (4) in fluid communication with said outlet and extending to said bottom wall of said chamber (*see* Figs. 1 and 2, above).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 33 is rejected under 35 U.S.C. § 103(a) as being unpatentable over *Hesselmann* as applied to claims 29, 31 and 36 above, and further in view of *Smith* (5,117,857).

Hesselman expressly teaches every element of the claimed invention except for a check valve.

Smith teaches a lid with a outlet conduit which incorporates a outlet valve (51).

At the time of the invention, it would have been obvious to one of ordinary skill in the art to add the check valve of *Smith* to the outlet of *Hesselman* in order to provide a means for severing the fluid connection between the vacuum line and the chamber (*see Smith*, lines 27-49).

Response to Arguments

Applicant's arguments with respect to claims 29, 31, 33 and 36 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claims 1-13, 22, 23 and 28 are allowed.

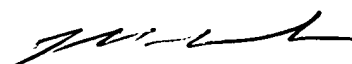

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Bogart whose telephone number is (703) 605-1184. The examiner can normally be reached Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Weiss can be reached at telephone number (703) 308-2702. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305-3590 for regular communications and (703) 306-4520 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 306-0858.

Attachment for PTO-948 (Rev. 03/01, or earlier)
6/18/01

The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the Notice of Allowability. Extensions of time may **NOT** be obtained under the provisions of 37 CFR 1.136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a).

Failure to take corrective action within the set period will result in ABANDONMENT of the application.
